

Stage 3 Judges' Rubric - DEMI Grade 4

App Lab Project - Stage 3 Judge Evaluation

Team Name / #	Project Name	Judge Name	Date

How to Score Every Row Enter ONE number from 1 to 5. Every row is worth 5 points; harder sections have more rows and therefore more weight.

1	Weak	Missing, incorrect, non-functional, or little/no meaningful evidence.
2	Developing	Partially demonstrated; important gaps remain or substantial support is needed.
3	Meets Expectations	Core requirement is present, understandable, and works at an acceptable/basic level.
4	Strong	Complete, accurate, well integrated, and supported by good evidence; only minor issues.
5	Excellent	Highly effective, reliable, purposeful, well-tested/polished, and clearly justified by the team.

Judge the final Stage 3 work, using the previous-phase requirements as the baseline. **Flow:** reward evidence, correct integration, and purposeful design - not complexity for its own sake. **Testing:** look for real trials/results, not only claims. **Hardware:** reward the best-fit use of components and reliable integration. **Teamwork & presentation:** look for shared ownership, clear communication, and the ability of multiple members to answer questions.

Specific Judging Task	What the Judge Should Look For	Score (1-5)	Judge Note
Problem, Research & Solution			Section Weight: 20 points
Problem & target user	The team clearly defines the real-world problem, who is affected, and why it matters.		
Research on similar solutions	Shows credible examples/screenshots of 1-2 similar apps or solutions and explains what was learned.		
Research insight / gap	Explains what is missing or could be improved in existing solutions and connects that insight to the project.		
App solution & main features	The app purpose and 2-3 main features directly address the identified problem and user needs.

Continue using the same 1-5 scale. Enter one score for each specific judging task.

Specific Judging Task	What the Judge Should Look For	Score (1-5)	Judge Note
UX & Prototype Design			Section Weight: 15 points
User flow	Screen-to-screen journey is logical, complete, and easy to follow.		
Wireframes / screen design	Screens or mockups match the planned features and show a clear interface structure.		
Usability & design consistency	Buttons, labels, navigation, layout, and visual choices are understandable and consistent for the target user.		
Programming & Functionality			Section Weight: 25 points
Working prototype	Core app screens and planned features function during the demonstration.		
Events & user input	Events such as button clicks trigger the correct actions and user inputs are handled properly.		
Variables & conditions	Variables and conditional logic are used correctly to control app behavior.		
Loops / functions / data logic	Uses suitable loops, functions, lists, or reusable logic where needed; logic is organized rather than repeated unnecessarily.		
Reliability & correctness	App produces correct results, handles common mistakes reasonably, and does not break during normal use.

Continue using the same 1-5 scale. Enter one score for each specific judging task.

Specific Judging Task	What the Judge Should Look For	Score (1-5)	Judge Note
Testing & Improvement			Section Weight: 15 points
Testing coverage	Team tests important screens, buttons, inputs, and user journeys instead of only one happy path.		
Evidence of testing	Shows concrete evidence such as test notes, screenshots, user feedback, before/after examples, or repeated trials.		
Improvement from findings	Team identifies issues found during testing and explains or demonstrates meaningful improvements.		
Business & Value			Section Weight: 10 points
User value & delivery idea	Explains who benefits, what value the app provides, and a realistic way it could be offered or shared.		
Differentiation & feasibility	Explains why the solution is useful compared with alternatives and keeps the idea realistic for the intended users.		
Teamwork & Presentation			Section Weight: 15 points
Shared teamwork & roles	Participation is balanced; team members contribute and can explain their own role in the project.		
Clear communication & demo	Presentation is organized, understandable, within time, and the demo supports the story of the project.		
Questions & project understanding	Team members answer judge questions clearly and show shared understanding of the app, decisions, and testing.

Specific Judging Task	What the Judge Should Look For	Score (1-5)	Judge Note
Extra Requirements / Optional Bonus			Optional Bonus - max 10
Advanced app feature - usefulness & depth	Optional extra feature meaningfully strengthens the same app rather than adding an unrelated idea.		
Advanced app feature - working evidence	Shows screenshots/code or a working demonstration proving the advanced feature is implemented or credibly prototyped.		

Score Summary

Section	Maximum	Section Subtotal	Notes
Problem, Research & Solution	20		
UX & Prototype Design	15		
Programming & Functionality	25		
Testing & Improvement	15		
Business & Value	10		
Teamwork & Presentation	15		
CORE TOTAL	100		

OPTIONAL BONUS (record separately, max 10)
